Quran MCP Server 🕌 - Revolutionary Islamic AI Assistant

npm package 2.0.0 License MIT

A **revolutionary** Model Context Protocol (MCP) server that gives AI assistants powerful access to Islamic resources. The first MCP server with **intelligent keyword search** for Quran and Hadith - no more needing exact verse numbers!

✨ What Makes This Revolutionary?

Intelligent Search (NEW!)

- **Search Quran by Keywords:** Find verses about "patience", "prayer", "mercy" without knowing verse numbers
- **Search Hadith by Topics:** Discover hadiths about "charity", "fasting", "manners" instantly
- **Topic-Based Discovery:** AI understands common Islamic topics and finds relevant content
- **Natural Language Queries:** Ask "find verses about patience" and get instant results

Comprehensive Quran Access

- **Arabic Text:** Original Quranic text in Arabic
- **Multiple Translations:** English translations from renowned scholars (Asad, Sahih International, Pickthall, Yusuf Ali, Hilali & Khan)

- **Full Surah Retrieval:** Get complete chapters with or without translations
- **Random Verse:** Daily inspiration feature
- **Verse-by-Verse Access:** Traditional reference-based lookup

Tafsir (Commentary)

- **Multiple Sources:** Access to various Tafsir collections
 - Tafsir Ibn Kathir (English & Arabic)
 - Maarif-ul-Quran
 - Tafsir al-Tabari (Arabic)
 - Tafsir al-Qurtubi (Arabic)
- **Verse-by-verse Explanations:** Detailed scholarly commentary

Hadith Collections

- **Six Major Collections:**
 - Sahih Bukhari (7,563 hadiths)
 - Sahih Muslim (7,563 hadiths)
 - Sunan Abu Dawud (5,274 hadiths)
 - Jami' at-Tirmidhi (3,956 hadiths)
 - Sunan an-Nasa'i (5,758 hadiths)
 - Sunan Ibn Majah (4,341 hadiths)
- **Random Hadith:** Daily hadith feature

Audio Recitations

- **Multiple Reciters:** Choose from renowned Quran reciters
 - Maher Al-Muaiqly
 - Abdul Basit
 - Abdurrahman As-Sudais
 - Mishary Rashid Alafasy
 - Mahmoud Khalil Al-Hussary
- **High-Quality Audio:** MP3 format in various bitrates
- **Playlist Generation:** M3U playlists for full Surahs

Performance Features

- **Intelligent Caching:** LRU cache with TTL to minimize API calls
- **Error Handling:** Comprehensive error handling with meaningful messages
- **Type Safety:** Full TypeScript implementation with strict mode
- **Validation:** Input validation for all parameters

Quick Start - 3 Ways to Use

Option 1: NPX (Instant - No Installation!) ⚡

The fastest way - works immediately with any MCP-compatible AI:

```
npx @quranmcp/server
```

Claude Desktop Configuration:

```
{
  "mcpServers": {
    "quran": {
      "command": "npx",
      "args": ["@quranmcp/server"]
    }
  }
}
```

Option 2: Global Installation

Install once, use forever:

```
npm install -g @quranmcp/server
```

Claude Desktop Configuration:

```
{
  "mcpServers": {
    "quran": {
      "command": "quran-mcp-server"
    }
  }
}
```

Option 3: Local Development

For contributors and developers:

```
git clone https://github.com/Prince77-7/quranMCP.git
cd quranMCP
npm install
npm run build
```

Claude Desktop Configuration:

```
{
  "mcpServers": {
    "quran": {
```

```
    "command": "node",
    "args": ["/ABSOLUTE/PATH/T0/quranMCP/dist/index.js"]
  }
}
```

Universal MCP Configuration

This server works with **any MCP-compatible AI agent**. Here's how to configure it:

Claude Desktop

macOS: ~/Library/Application Support/Claude/claude_desktop_config.json **Windows:** %APPDATA%\Claude\claude_desktop_config.json

```
{
  "mcpServers": {
    "quran": {
      "command": "npx",
      "args": ["@quranmcp/server"]
    }
  }
}
```

Other MCP-Compatible Agents

The server uses standard MCP protocol and works with:

- **Claude Desktop** (Anthropic)
- **ChatGPT with MCP** (when available)
- **Any MCP-compatible AI agent**

Simply use the same configuration format with `npx @quranmcp/server` as the command.

Available Tools (18 Total)

 **NEW! Search Tools (Revolutionary)**

search_quran

Search the Quran by keywords or phrases - Find verses without knowing exact references!

```
{
  "query": "patience",
  "translation": "en.sahih",
  "max_results": 20
}
```

Example Queries:

- "patience" - Find all verses about patience
- "those who believe" - Find verses with this phrase
- "prayer" - Discover verses about prayer
- "mercy forgiveness" - Multiple keywords

search_hadith

Search Hadith collections by keywords - Discover hadiths about any topic!

```
{
  "query": "charity",
  "collections": ["bukhari", "muslim"],
  "max_results": 20
}
```

Example Queries:

- "prayer times" - Find hadiths about prayer
- "fasting ramadan" - Hadiths about fasting
- "parents" - Hadiths about treating parents

search_quran_by_topic

Search by predefined Islamic topics - AI-optimized topic search!

```
{
  "topic": "patience",
  "translation": "en.sahih",
  "max_results": 10
}
```

Available Topics: prayer, patience, charity, faith, paradise, hell, prophet, allah, mercy, justice, knowledge, family, death, creation, guidance

search_hadith_by_topic

Search Hadith by Islamic topics - Topic-based hadith discovery!

```
{
  "topic": "prayer",
  "collections": ["bukhari"],
  "max_results": 10
}
```

Available Topics: prayer, fasting, charity, hajj, faith, prophet, companions, knowledge, manners, family, marriage, death, jihad, repentance

Quran Tools

get_quran_verse

Get a specific verse with Arabic text and translation.

```
{
  "surah": 1,
  "ayah": 1,
  "translation": "en.asad"
}
```

get_full_surah

Get all verses of a complete Surah.

```
{
  "surah": 1,
  "include_translation": true,
  "translation": "en.asad"
}
```

get_random_verse

Get a random verse for daily inspiration.

```
{
  "include_translation": true,
  "translation": "en.asad"
}
```

Tafsir Tools

get_tafsir

Get commentary/explanation for a verse.

```
{
  "surah": 2,
  "ayah": 255,
  "tafsir": "en-tafisr-ibn-kathir"
}
```

list_tafsir_sources

List all available Tafsir sources.

Hadith Tools

get_hadith

Get a specific Hadith from a collection.

```
{
  "collection": "bukhari",
  "hadith_number": 1
}
```

get_random_hadith

Get a random Hadith.

```
{
  "collection": "bukhari"
}
```

list_hadith_collections

List all available Hadith collections.

Recitation Tools

get_recitation_url

Get audio URL for a verse recitation.

```
{
  "surah": 1,
  "ayah": 1,
  "reciter": "Maher_AlMuaqly_64kbps"
}
```

list_reciters

List all available reciters.

Information Tools

get_surah_info

Get information about a Surah.

```
{  
  "surah": 1  
}
```

list_surahs

List all 114 Surahs with their information.

list_translations

List all available translations.

get_cache_stats

Get cache statistics for monitoring.

Example Queries for AI Assistants

Once configured, you can ask your AI assistant natural language questions:

Search Queries (NEW!)

- "Find verses about patience in the Quran"
- "Search for hadiths about charity"
- "Show me Quranic verses about prayer"
- "Find hadiths about treating parents"
- "What does the Quran say about mercy?"
- "Search for verses containing 'those who believe'"
- "Find hadiths about fasting in Ramadan"

Traditional Queries

- "Show me Ayat al-Kursi (verse 2:255) with translation and tafsir"
- "Get me a random verse from the Quran for today"
- "What does Surah Al-Fatiha say?"
- "Show me hadith number 1 from Sahih Bukhari"
- "Give me a random hadith"
- "Get the audio recitation URL for Surah Yasin"
- "List all available Quran translations"
- "What is the information about Surah Al-Baqarah?"

AI Understanding

The AI assistant now understands it can:

- Search by keywords instead of requiring exact verse numbers
- Find content by topic without knowing references
- Discover related verses and hadiths through natural language
- Combine search with traditional lookup for comprehensive study

Data Sources

This server aggregates data from multiple trusted Islamic resources:

- **Tafsir:** [spa5k/tafsir_api](#)
- **Hadith:** [fawazahmed0/hadith-api](#)
- **Quran Arabic:** [fawazahmed0/quran-api](#)

- Quran Translations: [AlQuran Cloud API](#)
- Recitations: [EveryAyah.com](#)

Why This MCP Server is Revolutionary

Before This Server:

- ❌ Had to know exact Surah and Ayah numbers
- ❌ Couldn't search by keywords or topics
- ❌ Required manual lookup in external resources
- ❌ Limited to reference-based queries

With This Server:

- ✅ **Natural language search** - "find verses about patience"
- ✅ **Keyword-based discovery** - Search entire Quran and Hadith collections
- ✅ **Topic-aware AI** - AI understands Islamic topics and finds relevant content
- ✅ **Universal compatibility** - Works with any MCP-compatible AI agent
- ✅ **Zero-install option** - Use with NPX instantly
- ✅ **Intelligent caching** - Fast responses with smart caching
- ✅ **18 powerful tools** - Comprehensive Islamic resource access

Real-World Impact:

- **Students:** Discover verses and hadiths for research without memorizing references
- **Educators:** Quickly find relevant Islamic texts for teaching
- **Researchers:** Search across multiple sources simultaneously
- **Daily Users:** Get instant answers to Islamic questions
- **Developers:** Build Islamic AI applications with ease

Contributing

Contributions are welcome! This is an open-source project for the Muslim community.

Priority Areas:

- Additional Tafsir sources (more languages)
- More Hadith collections
- Additional translations (Urdu, Arabic, French, etc.)
- Enhanced search algorithms
- Thematic indexing improvements
- Juz/Hizb navigation
- Performance optimizations

How to Contribute:

1. Fork the repository

2. Create a feature branch (`git checkout -b feature/amazing-feature`)
3. Commit your changes (`git commit -m 'Add amazing feature'`)
4. Push to the branch (`git push origin feature/amazing-feature`)
5. Open a Pull Request

License

MIT License - feel free to use this in your projects!

Acknowledgments

- All the scholars and organizations who made these Islamic resources freely available
- The Model Context Protocol team at Anthropic
- The open-source community

Support

For issues, questions, or suggestions, please open an issue on the repository.

Made with ❤️ for the Muslim community and AI enthusiasts
